

Message from the Town of Herndon to Town Residents

The Town of Herndon is pursuing the development of a "Small Area Plan" for the portion of the Town referred to as the Transit-Related Growth Area (TRG) shown on the map below. The development of this plan is anticipated to take 15 to 17 months and currently, we are in the pre-visioning phase of the planning effort. Public outreach and consultation are integral parts of this process. We are reaching out to schools within the Town to promote a survey for the town residents. This 5- minute online survey seeks public input, inspiration, and ideas for the vision and character of Herndon in the future, particularly the commercial areas closer to the Metro Station where the town expects new development. The survey is online at <https://www.herndontrg.com/project-survey>. In the hopes of hearing from as much of the community as possible, we hope that you can inform students' parents of this survey and help promote participation in this effort. We can also provide postcards with the survey QR Code on them if needed (a copy is attached below) The town is master planning the commercial areas around the Herndon Metrorail Station, known as the TRG (transit-related growth) in the area shown in the map below, and the feedback from the survey will help to inform project consultants as they begin to study the vision and character of the area. Thanks so much for your assistance in spreading the word on this project survey and Happy Holidays! If you have any questions, you can visit the project website at www.herndontrg.com or the Town's project website at www.herndon-va.gov/trg, or email us at community.development@herndon-va.gov.
